EXPERIENCE

Flying — Now
Founder — Chicago, IL

- Currently building an iOS app for frequent travelers with disruption alerts, live airport status, and a complete flight overview.

Gordian Software — Aug 2025 - Mar 2026
iOS engineer — Bellevue, WA

- Owned iOS development for Gordian Software's consumer travel app.
- Built features for flight and hotel deals, trip organization, and post-booking price monitoring.

RoamFlux — Apr 2024 - Present
Founder — Chicago, IL

- Launched RoamFlux, an iOS and Android app offering global eSIM connectivity in **200+** countries; reached **25k+** installs and **5k+** monthly active users.
- Architected a **Google Cloud** backend for orders, rate negotiations, and eSIM provisioning, supporting **$200k** in annual revenue.
- Grew the iOS and Android apps through multichannel user acquisition, including Google ads.
- Negotiated with international telecom partners to deliver custom SPN and automatic APN provisioning.
- Streamlined the interface to improve user retention and engagement.

Faidee — May 2021 - Feb 2022
Software engineer — Bangkok, Thailand

- Built a bespoke catalog app and website for Faidee's luxury jewelry line.
- Designed the UI and UX to reflect the brand's identity and make its collection easy to explore.
- Implemented real-time alerts for new product releases.
- Coordinated with marketing and design teams to deliver milestones **10%** ahead of schedule.
- Reduced load times through code refactoring and caching, and used analytics to guide iterative UI and UX improvements.
